## CORRUGATED PIPE TYPE 320N WITH PILOT HALOGEN FREE

### HALOGEN FREE PIPES

- These pipes are designed for cable routing and protection in electrical installations in areas with increased fire protection and stricter requirements regarding toxic chemical emissions released during combustion.
- These pipes do not propagate flames as they are made of self-extinguishing material.
- They do not release acids when extinguished with water.
- These corrugated pipes are intended for installations in public-use buildings.
