Installation instructions for the enclosure using brackets:

The installation process is unusually intuitive, it is enough:

1. Place two brackets in the dedicated openings located at the bottom of the enclosure, and then attach the enclosure with the brackets to the edge of the tray.
2. The final step is a simple pressure of the brackets to the enclosure body, ensuring a stable and safe mounting.

Such a solution not only saves the installer's time, but also increases the precision and safety of the installation, eliminating the need for additional tools or complicated installation techniques.
